

SA950 Discover Ground Search Detector

UNDERGROUND SEARCHING

HOBBY METAL DETECTOR

Applications:

- ★ Gold Detection,
- ★ Desert Detection,
- ★ Military Use,
- ★ Safety Inspection,
- ★ Archeology,
- ★ Treasure Hunting,
- ★ Beach Detection

FEATURES

- ◆ **Elimination** - Reference to a metal being eliminated means that the detector will not emit a tone, nor light up an indicator, when a specified object passes through the search coil's detection field.
- ◆ **Discrimination** - When the detector emits different tones for different types of metals, and when the detector eliminates certain metals, we refer to this as the detector Discriminating among different types of metals.
- ◆ **Pinpointing** - Pinpointing is the process of finding the exact location of a buried object. Long-buried metals can appear to the eye exactly like the surrounding soil, and can therefore be very hard to isolate from the soil.
- ◆ **Ground Balance** - Ground balancing is the ability of the detector to ignore, or see through the earth's naturally occurring minerals, and only sound a tone when a metal object is detected.
- ◆ **11.5*15" Big Coil** - Longer detecting distance and deeper searching range.

Power supply	1*9V battery (not include)
Sensitivity	8 setting
Operation modes	ALL METAL, ELIMINATION, DISCRIMINATION, RELIC, IRON, FERROUS, PULL-TABS, PINPOINTING
Big Coil	15" DD waterproof search coil with cable
Audio	Three-tone audio
Detected indication	LCD display
Battery Condition Indicator	Yes
Distinguish	Ferrous and non-ferrous
Warranty	1 years
BackLight function	can be use in dark area or night
