

### ◆ Introduction :

- ✧ Simple, light, small size, fully automatic portable tyre killer, which is widely used by the police and military.
- ✧ 40m remote control distance, to avoid people getting hurt by problem car.
- ✧ Needles can be replaced once missing.
- ✧ It's not weather-proof, please don't put it in a rain or wet environment for long time

### ◆ Technical Specification :

- 1 Structure: telescopic system, nails, rechargeable battery pack, control system, remote control;
- 2 Working voltage and working current: 11.1v (5200mAh high performance polymer lithium battery power supply back-up)
- 3 Effective length: 5m
- 4 Effective nail length: 35mm
- 5 Effective nail separation distance: 75mm
- 6 Flexibility: can be easily expanding, fast opening in 7 seconds.
- 7 Remote control range:  $\leq 50m$

**Securina Detection System Co., Limited.**

- 8 Continuous operating time: more than 100 times continuously operate, standby time:  $\leq 100$ hours
- 9 Charging voltage: 110~240V , 50Hz
- 10 Temperature: -40°C~55°C
- 11 The nails will be not split away off device under the pressure of 30N, but nails will be split away off under the pressure of 100N.
- 12 Effective intercept time: After passing through the tyre killer, tyre will be complete leaked air in 60seconds.
- 13 Manual operation when the low power supply or using up power
- 14 Load capacity: 20 Ton
- 15 Net Weight: 7.26kg
- 16 Packing size: 55cm\*42.5cm\*9cm

## Notice

- 1、NO damaging the roadblock or getting hurt by the roadblock.
- 2、 Please add the missing needles after using.
- 3、 Please contact the manufacturer if repair is needed.
- 4、 Please do not put the roadblock into a sleet or wet environment in a long time.
